

KUSHAGRA PANDEY

Infrastructure Support Professional | Azure Certified | Building toward Cloud & DevOps Engineering

kushagrapandey102@gmail.com | linkedin.com/in/kushagra-pandey-353b17175 | github.com/kushagrapandey-cmd

PROFESSIONAL SUMMARY

Infrastructure Support Professional with enterprise L1 experience in Windows Server troubleshooting, data-center monitoring, incident handling, health checks and basic AWS/Azure portal monitoring. Microsoft Azure certified (AZ-104, AZ-900) with a software-development foundation in JavaScript, React, Node.js and MongoDB. Building deeper capability in Linux, networking, automation, infrastructure as code, containers, CI/CD and Kubernetes for Cloud / DevOps aligned roles.

TECHNICAL SKILLS

Cloud & Infrastructure: Microsoft Azure, AWS portal monitoring, Windows Server, virtual/physical server health checks, resource monitoring, service status checks, log review.

Azure - Certified Knowledge: Virtual Machines, VNets, NSGs, Storage Accounts, Entra ID, RBAC, Azure Monitor, Backup/Recovery, Resource Groups, Subscriptions, Azure CLI.

Linux & Networking - Developing: Linux administration, systemd, processes, permissions, logs, TCP/IP, DNS, SSH, NAT, subnetting, routing/switching fundamentals.

DevOps - Currently Learning / Lab Track: Bash, Python automation, Terraform, Docker, CI/CD, GitHub Actions, Azure DevOps, Kubernetes and AKS.

Software Development: JavaScript, React, Node.js, Express.js, MongoDB, SQL, REST APIs, Git, GitHub.

PROFESSIONAL EXPERIENCE

HCLTech | Ericsson Project - Infrastructure / L1 Operations | Dec 2024 - Present

- Perform L1 troubleshooting on Windows Servers, including basic diagnostics, service checks/restarts and log analysis.
- Monitor server, backup, network and storage alerts; identify abnormal conditions and route/escalate incidents to the appropriate support team.
- Conduct routine health checks on physical and virtual infrastructure, including CPU, memory, disk, service status and connectivity observations.
- Use AWS and Azure portals for basic monitoring, resource-usage review, logs and service-status verification.
- Work with ticketing and monitoring workflows, including alert-driven incident creation, prioritization, chronology and SLA-aware handoff.
- Supported operational go-live activities, team coordination and roster/process organization during early project stabilization.
- Communicate critical-alert context and status updates to relevant teams/customer stakeholders as required by the support process.
- Participate in shift-based 24x7 infrastructure monitoring and handovers to maintain continuous alert coverage.

CERTIFICATIONS

Microsoft Certified: Azure Administrator Associate (AZ-104)

Microsoft Azure Fundamentals (AZ-900)

SELECTED PROJECTS

MediConnect | React, Node.js, Express.js, MongoDB, Google Drive API

- Built a UHI-inspired healthcare-record prototype with patient/doctor flows, REST APIs, authentication, generated patient codes and record-management workflows.
- Implemented document upload/retrieval with MongoDB metadata and Google Drive-backed file storage.
- Structured React frontend and Express backend modules for medical-record access, dashboards and supporting patient features.

YTGuide | Python, Streamlit, recommendation logic

- Built an academic recommendation-system prototype that ranks study-video entries by topic and presents five focused recommendations.
- Worked with prepared data, similarity logic and a lightweight Streamlit interface.

iNotebook | MERN

- Built a notes application with user authentication and CRUD operations using React, Node.js, Express and MongoDB.

Kushagra Portfolio Website | Next.js, TypeScript

- Built an evidence-based engineering portfolio separating professional experience, certifications, projects and currently-learning skills.

INTERNSHIP

Full-stack Web Development | Bharat Intern | Jul 2023 - Aug 2023

- Developed React-based web projects with a MongoDB-backed backend, responsive interfaces and user-authentication flows.

EDUCATION

Bachelor of Technology, Computer Science - Axis Institute of Technology | 2020 - 2024

Intermediate - K.R. Education Center | 2017 - 2018

CURRENT DEVELOPMENT DIRECTION

Hands-on Technical Development: Linux administration, networking fundamentals, Azure administration practice, shell scripting, Python automation, Terraform, Docker, CI/CD, Kubernetes/AKS and observability foundations.

Target Roles: Cloud Support / Cloud Operations, Azure Administrator, Junior Cloud Engineer, Junior DevOps Engineer, Infrastructure / Platform Support roles with a path into automation.
