PROFESSIONAL SUMMARY

HCLTech infrastructure experience across Ericsson L1.5 support and Benchmark Electronics ICC shift leadership: Linux and Windows troubleshooting, AWS/Azure portal checks, incident coordination and operational go-live support, backed by Microsoft Azure certifications and a software-development foundation.

HCLTECH EXPERIENCE | DEC 2024 - PRESENT

Benchmark Electronics | Nov 2025 - Present

ICC | Shift Lead

Tools / workflows: SolarWinds, Incident / ticketing workflows, ICC technical-team groups

- Supported the project through operational go-live and early stabilization, helping establish day-to-day ICC monitoring and coordination practices.
- Lead shift coordination, organize coverage and handovers, and track critical alerts and pending incidents with the relevant technical teams.
- Created project SOPs to document monitoring, incident handling, escalation and shift-handover procedures.
- Created ICC communication groups to connect Windows, backup, network and storage teams and support timely incident updates and handoffs.
- Monitor infrastructure alerts through SolarWinds and email-driven workflows; review ticket routing, priority and incident chronology.
- Work with clients and customer stakeholders to understand monitoring requirements, clarify operational expectations and communicate critical-alert status.
- Helped organize the roster and cross-team workflows during the initial months, supporting continuous coverage and consistent operational practices.

Ericsson | Dec 2024 - Oct 2025

Rhythm Team | L1.5 Infrastructure Support

Tools / workflows: BHOM portal, AWS portal, Azure portal, PuTTY / SSH, RDP, SVM portal

- Provided L1.5 infrastructure support for Linux and Windows servers, including servers hosted in AWS and Azure environments.
- Performed initial diagnostics using service-status checks, CPU, memory and disk observations, connectivity checks and log review; followed approved troubleshooting procedures before escalation.
- Used PuTTY / SSH for Linux access and RDP for Windows access, alongside AWS and Azure portals for resource health and monitoring checks.
- Reviewed infrastructure events through the BHOM portal and operational queues; recorded investigation findings and coordinated escalation to specialist teams.
- Coordinated Multiple Failed Login (MFL) control work with two team members reporting to me for that activity, tracking follow-ups and communicating investigation status.
- Maintained incident updates, prioritization and shift handovers to support continuity and SLA-aware troubleshooting.

SKILLS, CERTIFICATIONS & PROJECTS

TECHNICAL SKILLS

Professional: Linux / Windows L1.5 support, Infrastructure monitoring, Shift leadership & SOPs, Azure / AWS portal troubleshooting.

Support tools: BHOM, AWS / Azure portals, PuTTY / SSH, RDP, SVM, SolarWinds and incident workflows.

Developing: Linux administration, Networking fundamentals, Azure administration practice, Shell & automation foundations, DevOps foundations.

Software foundation: JavaScript, React, Node.js, Express, MongoDB, Next.js, TypeScript, Git.

CERTIFICATIONS

AZ-104 | Microsoft Azure Administrator

AZ-900 | Microsoft Azure Fundamentals

SELECTED SOFTWARE PROJECTS

MediConnect | MERN, Google Drive API

Healthcare-record prototype with patient / doctor workflows, document upload and retrieval, MongoDB metadata and Google Drive-backed storage.

Riverflow | Next.js, TypeScript, Appwrite, Zustand

StackOverflow-style learning application with authentication and voting flows.

YTGuide | Python, Streamlit, Pandas

Academic team recommendation prototype presenting five study-video recommendations by topic.

Kushagra Portfolio | Next.js, TypeScript, Vercel

Engineering portfolio with an accessible responsive interface, server-side contact delivery and automated quality checks.

DEVOPS LEARNING JOURNEY

github.com/kushagrapandey-cmd/Devops-Learning

Public workspace for Linux, networking, Azure, Bash / Python and Git notes, scripts and labs. Docker, Terraform, CI/CD, Kubernetes / AKS and observability are roadmap topics, not claims of completed production expertise.

INTERNSHIP

Full-stack Web Development | Bharat Intern | July 2023 - August 2023

- Developed internship web projects using React and a MongoDB-backed backend.
- Worked with user authentication and responsive web interfaces.

EDUCATION

Bachelor of Technology, Computer Science | Axis Institute of Technology | 2020 - 2024

Intermediate | K.R. Education Center | 2017 - 2018
